

BRUSH-SUEDING MACHINE

LISA 4 KNIT (open width) - LISA TUB

LISA 4 KNIT PLUS (open width & Tubular) - LISA 4 WOVEN

Mario Crosta
GROUP

4 Brushes

Model equipped with 4 brushes for the treatment of woven and knitted fabric, both open width and tubular. Working width 1.200/1.800/2.200 mm. This machine is equipped with 4 brushes for the process of knitted and woven fabrics. It's divided in two independent modules, each of 2 brushes which allow to set two different brushing effects for each module. The strength point of this machine is the possibility to set in the display the final effect required on the fabric as a parameter. The achievable result is independent on the fabric type and it remains constant during the time due to the electronic automatic adjustment of the machine.

BRUSH-SUEDING MACHINE

LISA 4 KNIT (open width) - LISA TUB

LISA 4 KNIT PLUS (open width & Tubular) - LISA 4 WOVEN

Technical features

Suitable for all kind of fibers.

Installed brushes 4

Automatic seam guard.

Fabric spreading and centring unit for knit.

Display touch-screen for parameters setting and control.

Impulse running of each device with independent driving system.

Working hours counter for preventive maintenance control.

Touch-screen display to guide and assist the operator during each operation phase.

Programmer able to record up to 400 work programs.

Driving system with inverter-controlled three-phase motors.

An air conditioner installed on the upper section of the electric control box keep the temperature constant and avoid the formation of condensate, thus ensuring a long duration of all electric and electronic components.

Parameters can be set both during machine standstill and while working.

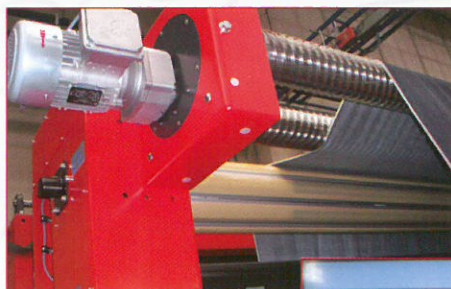

Equipped with plaiter or winder

Automatic control of fabric tension

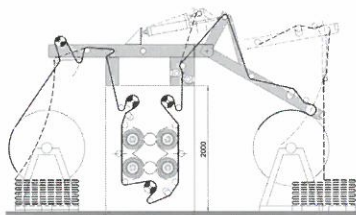

Possible installation of different kinds of brushes

Technical data

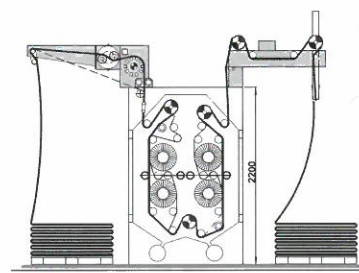

Installed power	25 kw
Effective energy consumption	18 kw
Working width	mm 1.800÷3.200
Adjustable production speed	m/min 5÷40
Brush rotation	rpm 700÷1.500
Impact on the environment Compliant with all safety, EMC and noise European standards
